Features	Suitable for
<ul style="list-style-type: none"> Up to 18 skewers per minute Tabletop size, small and compact Removable moulds and conveyor for cleaning 	<ul style="list-style-type: none"> Satay or saté Yakitori and kushiyaki Sausages, hotdogs, fishballs, meatballs and more

How it works

The Tabletop Automatic Skewer is a skewering machine that skewers satay, yakitori or any on-stick products automatically.

Users will preload the meat or products onto the mould trays; here are 6 slots per tray. Once loaded, the user inserts the filled tray onto the stationary conveyor and presses the start button to start the skewering. The skewered product tray can then be removed and the entire cycle can be repeated.

The tray design allows users to preload the meat or product without having to chase the moving conveyor as compared to the other model.

The conveyor is designed to be removable without any tools for cleaning, alongside with the top mould and mould trays. Making cleaning easy and fuss free.

Technical Specifications

Tabletop Automatic Skewer	KSE-ST18
Output	Up to 18 skewers/min
No. of moulds	1 top, 5 bottom trays
Mould designs (standard)	Singapore satay and yakitori
Custom mould design	Hotdog, sausage, fishball, meatball, kebab, custom meat thickness, and more
Stick type	Round bamboo skewers
Stick length (mm)	150 and 200
Stick diameter (mm)	3
Operating voltage	Single phase, 13 amps, 230 V, 50 hz
Power consumption	1.5 kw/hr
Material for machine	Stainless steel 304 and 316
Material for moulds	Nylatron
Weight	52.5 kg
Dimensions (length x width x height in mm)	700 x 670 x 610
